

RBI REGULATORY GUIDELINES REFERENCE

Credit Underwriter AI | Enterprise Portfolio Knowledge Base

Document ID	CUAI-RBI-001
Version	1.0
Classification	Internal Use Only
Effective Date	01 August 2026
Owner	Regulatory Compliance
Review Cycle	Annual or on material change

1. Purpose

Provide a regulatory-reference layer for the RAG Knowledge Base. This project document summarizes topics to retrieve from authoritative RBI material; it is not a replacement for current RBI directions.

2. Scope

This fictional internal policy is designed for the Credit Underwriter AI portfolio project. It supports automated underwriting, human review, auditability and policy-aware AI explanations. It is not a policy of any real financial institution.

3. Authoritative Source Policy

- RBI regulatory material is authoritative for this knowledge-base category.
- Source URL/document identifier, publication/update date and retrieval date should be stored as metadata.
- Regulatory text must be refreshed when RBI updates the relevant direction/circular.
- Internal policies must not be represented as RBI requirements.

4. KYC / CDD Reference Topics

- Customer identification and verification.
- Customer due diligence and risk-based controls.
- Beneficial ownership for applicable customers/entities.
- Enhanced due diligence for higher-risk situations.
- Ongoing due diligence and record-keeping.
- Board/senior-management governance and internal controls as applicable.

5. Digital Lending Reference Topics

- Disclosure and transparency requirements applicable to digital lending.
- Borrower consent and need-based data collection.
- Audit trails and data governance.
- Role and accountability of regulated entities and lending service providers.
- Customer-facing disclosures and grievance/recovery-related requirements.

6. RAG Handling Rules

- Regulatory evidence must be tagged as REGULATORY and ranked above fictional internal policy when the query concerns regulatory requirements.
- Copilot must distinguish 'RBI requirement' from 'internal project policy'.
- If the retrieved regulation is outdated or ambiguous, Copilot must say so and avoid asserting a definitive current requirement.

- Every regulatory answer should retain source metadata for auditability.

7. Source Register

Source	Topic	Status	Usage
RBI Master Direction – KYC Direction, 2016	KYC/CDD/beneficial ownership	Reference	Regulatory RAG evidence
RBI Digital Lending framework/material	Digital lending/data/borrower disclosures	Reference	Regulatory RAG evidence
Current RBI circulars/directions relevant to product	Product-specific rules	Refresh required	Regulatory RAG evidence

The project should ingest the current official RBI source files rather than treating this summary document as the source of law.

Version	Date	Change
1.0	01 August 2026	Initial enterprise-style portfolio knowledge-base document

Important Disclaimer

All numeric thresholds, approval limits, scoring bands and operating procedures in these internal documents are illustrative project controls. They must not be presented as universal regulatory requirements. Regulatory content is maintained separately in the RBI Guidelines document and should be refreshed from authoritative RBI sources before any real-world use.
